Computer science graduate with a passion for creating innovative projects. Committed to continuous learning and eager to apply my skills in a dynamic role where I can contribute to cutting-edge technology and drive measurable results.

## PROJECTS

---

### Etherfund – Blockchain-based CrowdFunding

- Developed and deployed a decentralized crowdfunding platform using React, Solidity, and Ethereum Ganache, enabling secure and transparent fundraising campaigns.
- Created and integrated smart contracts in Solidity, allowing campaign creators to define funding goals and backers to pledge contributions; deployed project at [EtherFund](#).

### Respare – Response Sharing Platform

- Designed and coded a response-sharing platform using HTML, CSS, Python, Django
- Provide a Platform for users to share their views on a trending topic

### Daily Tourneys – Classified Website

- Designed and coded a response-sharing platform using HTML, CSS, Python, Django
- Provide a Platform for users to share their views on a trending topic

## EDUCATION

---
